

### Glass Color Options

Our glass blowers have perfected the very challenging process of re-blowing up-cycled bottle glass. We use the standard production bottle colors that are common for wine, champagne, beer and liquor bottles. The photo above shows the typical color ranges including a variety of greens and blues, along with brown and clear. We typically use a true clear, but also find that there are some clears with blue or greenish tints as well. Please be as general or specific as you like when making a request and we will do our best to accommodate.
